Skill Highlights

- Adaptability
- Strong decision maker
- Complex problem solver
- Creative design
- Innovative
- Service-focused

Experience

Contractor - Public Service Commission(Ghana) 02/2022-present

Responsibilities:

- Build a system for keeping records and documents received by the office
- Closely working with IT to adapt fully the organizational structure into using digital system instead

Key achievement: We are eliminating the use of traditional office activities including gradually removing paper based office mode of communication.

Datamaker 04/2020 – 09/2021

Responsibilities:

- Prepare detailed qualitative solutions
- Develop project concepts and maintain workflow.

Key achievement: Design project infrastructure and key workflows

Orixxon 2019 – 04/2020

Responsibilities:

- Design backend architecture
- Design an ecommerce solution to bridge local creators to consumers

Key achievement: Built traditional websites and ecommerce solutions based on consumer **requirements**

Junior Developer, Ghroupdrive Ltd 03/2017 – 05/2018

Responsibilities:

- Refactor entire API backend into python Django
- Work closely with other developers to design and implement better solutions for the system

Key achievement: We managed to rewrite an enitire api written in c# to django
